The Right Fit.....For You

The 1 Day Agile Workshop will introduce you to the fundamentals of Agile principles, concepts and practices. We can help improve teamwork and increase productivity, enabling you to fully benefit from the Agile framework.

At the end of the course, learners will understand the principles and values of the Agile Manifesto and be familiar with the various Agile methodologies. Our workshops examine some of the core principles behind the agile movements, along with the economics that support them. All trainees will walk away with practical tips that they can implement immediately.

We have the benefit of working with multiple teams in a variety of organisational settings and we have helped them navigate the process of becoming an Agile organisation that uses the Scrum framework to get work done.

Below you will find a proposed course outline.

Our trainer can also work with you before the course to get your input and tailor the content as needed.
