The Right Fit......For You

Our Scaled Scrum & Agile courses aim to help learners facilitate discussion and activities designed to explore the patterns and techniques behind successfully scaling Scrum across organisations of varying sizes.

Building a successful Well-Formed Scrum Team can be a difficult yet rewarding endeavour. But what happens when one Team isn't enough? Let's face it, most of today's projects are just too large for one Scrum Team to tackle alone. This causes a need for many organisations to scale the Scrum framework. Scaling is never easy.
This course will give you an overview of best practice scaling techniques and takes a close look at organisational structure and how this impacts the scaling process.

This workshop uses a mixture of class room study, group exercises and discussions. Understanding the complexities of a multi-team environment is critical to the successful scaling of Scrum. Below you will find a proposed course outline.

Our trainer can also work with you before the course to get your input and tailor the content as needed.
